AURORA MOBILE LEARNING APP

You are invited to join a workshop demonstrating an innovative mobile learning app and platform that enables Aurora network members to create engaging gamified digital learning short courses for students and staff that can be shared across Aurora Universities. The Ryze app and platform allows users to create inspiring learning content easily via its micro-lesson design.

Join us to find out about the pilot opportunity of this mobile first platform created by academics from the UEA. The workshop is open to all Aurora university staff but might be specifically relevant to leaders within work package 3 - Learning for Societal Impact.

To find out more please respond to this email and join the zoom meeting on the 24th June at 15:00 (CET) : https://us02web.zoom.us/j/8597814187   Zoom Meeting ID: 859 781 4187

Features of the platform include:
- Add segmented micro-lesson journeys
- Create quizzes and gamified learning
- Use videos, images and visual interactivities
- Enables mobile messaging across student cohorts
- Send mobile notifications directly to students
- See detailed analytics about user engagement
